(54) INK JET RECORDING PAPER

(57)Abstract:

PROBLEM TO BE SOLVED: To provide an ink jet recording paper, which is excellent in the ink jet recordability such as especially a printing density, a printing water resistance, an ink absorptivity and luster and has a high luster on the ink jet recording paper.

SOLUTION: In the ink jet recording paper, in which a priming coating layer including a pigment, a cationic compound and an adhesive is provided on one side of a base material and a cast layer including the adhesive, the pigment and a releasant is provided on the priming coating layer, among the cationic compound, the compound having the weight average molecular weight of 100,000 or more occupies 50 to 90 mass % of its total mass and, at the same time, the compound having the weight average molecular weight of 10,000 to 50,000 occupies 10 to 50 mass % of its total mass.
